

Telesto Infotech Private Ltd was formed in 2005 with the aim of providing cutting edge search solutions. Our focus is to provide a cost effective framework for search which can be deployed by organizations with ease. With the solid base of a reliable search, we are poised to deliver the best in the field of content management and knowledge management.

## Why Search?

- An average employee spends **2.5 hrs/day** searching for information
- More time is spent in recreating existing information than creating new knowledge
- **1/3 rd of productive time** spent in knowledge reworking
- Corporate intranets have huge amount of information which need to be tracked
- Websites with a Search retains viewers and increases the hits

\$2.5 million is lost every year due to the inability to locate and retrieve information by a firm employing 1000 knowledge workers

– *IDC Report*
